

CCHS Building Committee

Margaret Waterman

April 6, 2011

Things We Want To See:

STRUCTURE:

- Eliminating "pinch points" - trying to squeeze 700 students through one doorway in 4 minutes is not easy!
- Places to "be" besides library and cafeteria
 - Senior corners, nooks, a hang-out room, etc.
- A bigger darkroom, in the photography section of the art building
- "Greenspace" accessible to students during school hours
- A centrally located common room area
- Metal shop and wood shop
- Conference room spaces (small rooms in-between other rooms/in the library)
- More bathrooms
 - Especially in library/learning commons and also near the cafeteria
- More functional student parking lot
 - As it stands now, it is very cramped and also there are a lot of blind spots/ areas it would be easy to get in an accident in
- Lots of windows for natural lighting
- Functional dance room/studio
- Make everything accessible from the inside so we don't have to go outside when it's too cold out
- A big, centralized hallway that everything else branches off of
- A functioning one-room "study hall"

INSIDE FEATURES:

- Shower area in the gyms for in between sports events/dances
- Recording studio
- Nice water fountains that have a "water bottle stem"
- More places like the MARC (classes dedicated to studying)
- Risers in the cafeteria
- A school store
- Lovable learning commons
